

Grinding in corners just got easier with the flexibility of the Trimmable Tiger Disc!

Trimmable Tiger® Flap Discs

Durable and efficient, the Trimmable Tiger is designed for hard-to-reach angles and increased life!

- The unique composite backing can be trimmed, exposing more abrasive material and extending disc life, resulting in lower grinding and finishing costs.
- The trimmable backing also allows for high flexibility, enabling the operator to access hard-to-reach areas such as right angles and irregular shapes, and grind on-edge without changing tools, increasing productivity.
- The non-marking backing will not damage the work-piece, resulting in less re-work and scrap.
- Like all Tiger Discs, the Trimmable Tiger aggressively removes stock while providing excellent finish consistency - all in one step.

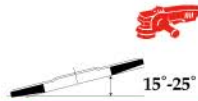

The backing can be trimmed up to 3/8" from the original diameter, dramatically extending the life of the disc.

Applications

- ✓ Grinding and finishing in one step
- ✓ Weld blending
- ✓ Deburring
- ✓ Deflashing
- ✓ Edge chamfering
- ✓ Stock removal

Trimmable Tiger Disc - Angled Style (Type 29)

High stock removal, long life and flexibility.

■ Available in Display Packaging. Add "P" to end of Item No. when placing order. See pages 159-161 for Display Packaged Product.

50002

Trimmable Tigers are packaged in a convenient display box with a window and perforated sides for quick, easy opening and display.

Trimmable backing for extended disc life.

The Trimmable Tiger Disc's innovative design enables the operator to reduce the diameter of the backing to extend disc life. To trim backing, run against a sharp metal edge until desired backing diameter is achieved as shown at right.
